About This Game

Starving is a great story about a deceased person called a zombie, who started to look for food in a strange place where he had found himself under unclear circumstances. Passing the tunnels along, he comes across a game console with a huge monitor, which will unfold all the game events.

About this game

It's an arcade game with logical elements, in which life of a small zombie is in your hand, and it's wandering the game world in the hopes of coping with the hard trials that befell it.

The game consists of 30 levels with a small number of traps, where your main task is to pass them, counting on your sense of distance and reflexes only. If you can handle it, you will find a rather unexpected ending.

Title: Starving
Genre: Casual, Indie

A puzzle in a simple performance with fun music, the game can be played pretty quickly, well, it's not expensive.. eat brain and get stronger.. <https://youtu.be/QMfk315-Uwo>

It is a tiny game maker game.

That Puzzle where you have to move the thing into walls and find the path?

That's the whole thing.

Nothing wrong with that.

There is also some cool zombie art. I like the washed out green colors.

Anyway, for less than a buck, I would say it is worth it.. Cool, interesting game with a plot drawn in the form of comics. The graphics are colorful and muffled, pleasant.. Simply casual arcade low price puzzle - and that's all you need to know!. Worth the money for the time played. Remember the password dont be as stupid as me. Good game with nice gameplay and colorfull graphic

Good game :). pretty good game. in fact this is a puzzle game, built on a same principle as a big hit both on mobile and steam platforms - Quell.

however, this one features greatly drawn comics graphics and interesting approach to ui. another difference - you operate zombies eating brains :) Overall - i recommend.. An interesting puzzle game made in retro style. The first levels are simple, but the further we go, the more traps appear on the maps. Remember the level codes - this will allow you to quickly go through the game.. It's amazing story! Graphic design of the game is simple, but I really liked the story.. Cute, simple. Not sure if it really is a "puzzle" game per se. It's got a bit of thinking, but it's more about timing? Meh. :) Still, good game overall. Worth the 25 cents, lolz.. Was nice to play this little fun game!

But not worth more than 10cents ;). No replayability.
